Portfolio: <https://somashekharh.github.io/portfolio/>

PROFESSIONAL SUMMARY

Technical background includes Oracle Database 19c, Oracle Enterprise Manager (OEM), SQL, RMAN, Data Guard concepts, Data Pump, Linux/Unix administration, Shell scripting, and Power BI. Strong interest in Oracle Database Administration, Linux, automation, DevOps, and Azure database administration, supported by continuous learning through technical courses and practical lab work.

TECHNICAL SKILLS

Database: Oracle Database 19c, Oracle SQL, Oracle Enterprise Manager (OEM), RMAN, Data Guard concepts, and Data Pump; backup and recovery; user and privilege management; listener and connectivity troubleshooting.

Operating Systems: Linux and Unix; RHEL; Ubuntu; Windows.

Automation and DevOps: Shell scripting; Ansible (Basic); Jenkins (Learning); SSH; Git and GitHub fundamentals; PL/SQL.

Reporting and Tools: Power BI; Excel; HTML reporting; SQL Developer; Toad; PuTTY; WinSCP; VS Code.

Service Management: Incident management; change management; production support; operational reporting; documentation; stakeholder coordination.

Professional Skills: Troubleshooting; ownership; collaboration; continuous learning; security awareness; attention to detail.

Cloud, Cybersecurity, and Programming: AWS; Azure; VMware; VirtualBox; Kali Linux; Nmap; Wireshark; Metasploit; IDS/IPS; VirusTotal; vulnerability assessment; incident response; log analysis; TCP/IP; subnetting; firewalls; Python; Bash.

Languages: English; Hindi; Kannada.

PROFESSIONAL EXPERIENCE

LTM — Oracle DBA | Cloud & Infrastructure Engineer

Current role

PROJECT EXPERIENCE

CIS-FMB-App Dev COE

Start date: 20-Aug-2026 · End date: 20-Aug-2026

Cloud and infrastructure management engagement supporting application development and operational activities within the CIS-FMB App Dev Centre of Excellence.

- Support Oracle database and infrastructure operational activities for assigned environments.
- Monitor database availability, storage utilization, sessions, alerts, listener connectivity, backup status, and general health using OEM and SQL checks.
- Assist with user access, role and privilege administration, account troubleshooting, and adherence to access-control procedures.
- Investigate incidents and service requests, document observations, provide status updates, and coordinate with application and infrastructure teams.
- Use Linux/Unix, SQL, Shell, and PowerShell utilities for troubleshooting and recurring operational checks.
- Maintain handover notes, technical documentation, and operational reports.

CIS-FMB-Alaska Database Modernization

Start date: 11-Dec-2025 · End date: 31-Dec-2026 (scheduled end date)

Database modernization engagement within Cloud & Infrastructure, supporting assessment, operational readiness, database administration, validation, coordination, and reporting activities for the Alaska environment.

- Assist with database inventory, configuration review, readiness checks, and technical information collection for modernization activities.
- Support database health checks, capacity review, backup validation, connectivity verification, and pre-change or post-change validation.
- Coordinate with database, application, cloud, and infrastructure teams during planned modernization and change activities.
- Prepare SQL-based reports and structured updates covering database growth, backup, inventory, and operational observations.
- Follow incident, change, security, access-control, and documentation processes to support traceable delivery.
- Contribute to reusable scripts, checklists, and reporting templates to improve consistency and reduce manual effort.

System Tron — Cybersecurity Intern

Mar 2025 – Apr 2025

- Completed vulnerability scans on 25+ endpoints and identified 10+ critical issues.
- Performed incident response and log analysis, improving detection by 15%.
- Simulated attacks and security configurations in a home lab.

Deloitte Australia · Forage — Cybersecurity Virtual Experience

2025

Analyzed breach logs and documented incident response during a cybersecurity virtual experience program.

SELECTED PROJECTS

PhishNet — Machine Learning Phishing URL Detector

Built a Django application that analyzes URLs for phishing risk using a Random Forest model. Includes secure login, a scan dashboard, PDF reports, and administrative controls. Reported model accuracy: 92%.

Technologies: Python, Django, Random Forest, Machine Learning. **GitHub:** <https://github.com/Somashekharh/PhishNet>

Cybersecurity Home Lab

Configured an isolated VMware virtual environment for network reconnaissance, vulnerability assessment, packet analysis, and system hardening using Kali Linux, Metasploitable 2, and Windows 10.

Technologies: VMware, Kali Linux, Metasploitable 2, Windows 10, Nmap, Metasploit, Wireshark.

Cybersecurity Tools and Scripts

Created a password strength checker, an authorized-use port scanner, and a phishing website detector that can use reputation APIs.

Technologies: Python, sockets, VirusTotal API. **GitHub:** <https://github.com/Somashekharh/Cybersecurity-Projects>

TRAINING AND PROFESSIONAL DEVELOPMENT

Completed Training

Oracle Database Foundations; Linux Fundamentals — Packt, Jan 2026; Foundations of Oracle Database Administration; Google Cybersecurity Specialization — Google, Apr 2024; Fundamentals of Ansible — Red Hat, Jul 2026.

Learning in Progress

IBM Applied DevOps Engineering Specialization — Coursera, In progress; Claude Certified Developer Foundations — Preparatory, In progress.

Other Credentials

LFS101: Introduction to Linux — The Linux Foundation, Dec 2025; Information Technology Fundamentals — IBM SkillsBuild, Jun 2025; Deloitte Australia - Cyber Job Simulation — Forage, May 2025; Computer Hardware Basics — Cisco, Apr 2024; Google IT Automation with Python Specialization — Google, Feb 2024; Introduction to Cybersecurity — Cisco, Jan 2024; MongoDB Basics - ICT Academy Learnathon — MongoDB, Oct 2023.

EDUCATION

Bachelor of Computer Applications (BCA)

KLE Society's College of BCA, Belagavi · 2023–2025

Pre-University — PCMB

Government PU College, Bailhongal · 2020–2022

AWARD

Winner, Abhimanyu's Cyber Vyuha — National IT Fest 2025, KLS Gogte College of Commerce.
